Coursera

Issued Oct 2021

## Introduction to Data Science in Python

Coursera

Issued Apr 2020

## Applied Plotting, Charting & Data Representation in Python

Coursera

Issued Apr 2020

## PROJECTS

---

### FLUTTER GROCERY

*Flutter, Firebase, javascript*

Flutter grocery is an Android/IOS solution made with Flutter. It's composed of three apps:

- User App: Each user can order products, add multiple shipping addresses, pay with a credit card or via delivery, check orders status, and receive notification on order status changes...
- Admin App: The admin can add/edit/remove products, shipping methods, and categories, manage orders (Approve, decline, make it in process, add a comment, assign orders to delivery boy, view address in map...), Add/Edit/Remove delivery boys, receive notification on every new order...
- Delivery boy App: Each delivery boy has a list of deliveries, he delivers/declines delivery and uploads an image with a comment, also he can view the address on the map. For each completed/declined delivery, a new delivery history is added to the profile.

### AHMINI

*Flutter, REST API*

Ahmini is a technological facilitator that allows the integration of uninsured rural women into the social security system.

In this project, I was responsible with a mobile development team for creating the App and working with the backend team on the API integration

### KASB

*Flutter, REST API, Firebase cloud messaging*

KASB is a Fintech solution that gives the possibility to users to earn money by buying goods from specific retailers. Through the app, a user can check the list of retailers and their addresses, scan their code and start earning.

In this project, I was responsible for developing the whole mobile app from zero to a fully working version.

### FORSTEC

*Flutter, REST API, Firebase cloud messaging*

Forstec is a platform designed specifically for the business community. Users can create an account and fill it with their professional experience and then start applying for jobs offered by companies.

In this project, I was responsible for developing the whole mobile app from zero to a fully working version.

## VOLUNTEERING

---
